

Account Settings

Account (Change Personal Information)

Change Password: Allows changing the account password. You can change password only if you know the original password.

Change Display Name: Allows changing the Display Name associated with the account

Change Email: Allows changing the email address associated with the account. A valid account is needed so that password recovery works.

Remote Login (Add Additional Security)

Set Remote Login and Answer: For additional security, you can add an additional remote login question and answer that will be required for login when logging in remotely via the web browser and the mobile client.

Location (Data Storage Location)

Change User Data Directory: Shows you the current location where Tonido will save user data. You can change this location if you want.

Please note that for the TonidoPlug, you need to make sure the directory is set to a plugged in Hard drive and the path is valid. If the User Data Directory is set incorrectly, all applications will get suspended.

Language (Switch to different Language)

Change the Language: Switches to a different language

Account (Switch to a different account)

Switch Account: Allows you change the name associated with that computer or TonidoPlug either by switching to different account or by creating a new account
