Tonido Apps Management

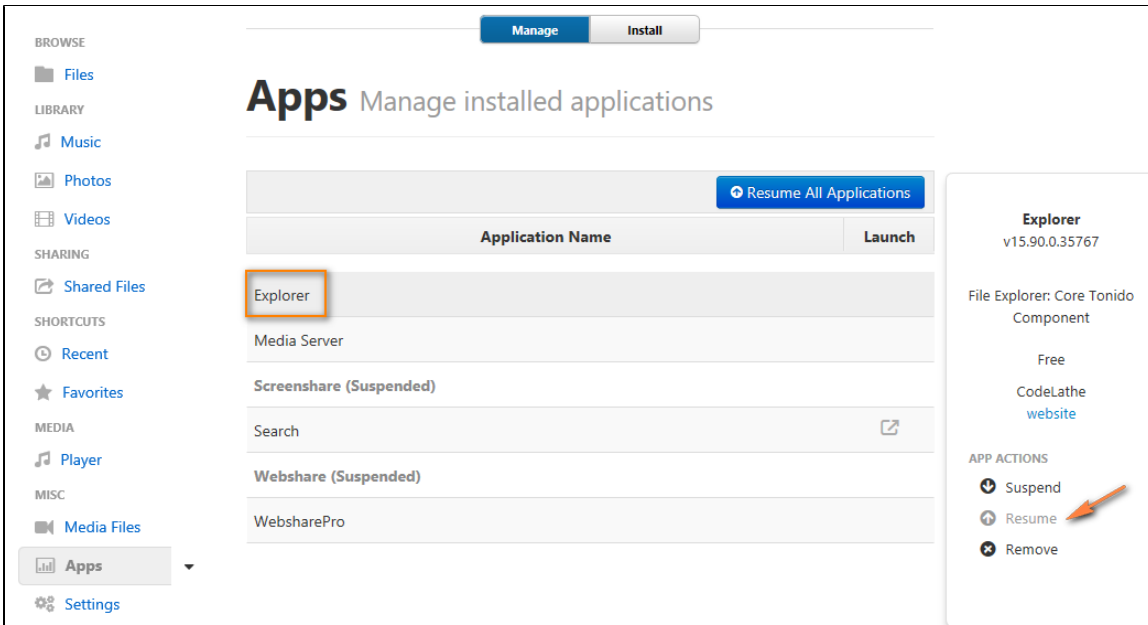

Tonido provides with some Apps for their users benefits.

EXPLORER

Explorer View is a feature that is integrated with Tonido that allows a user to access a document library as if you were accessing a file system through a Windows Explorer window.

Make sure Explorer is always in "resume" status.

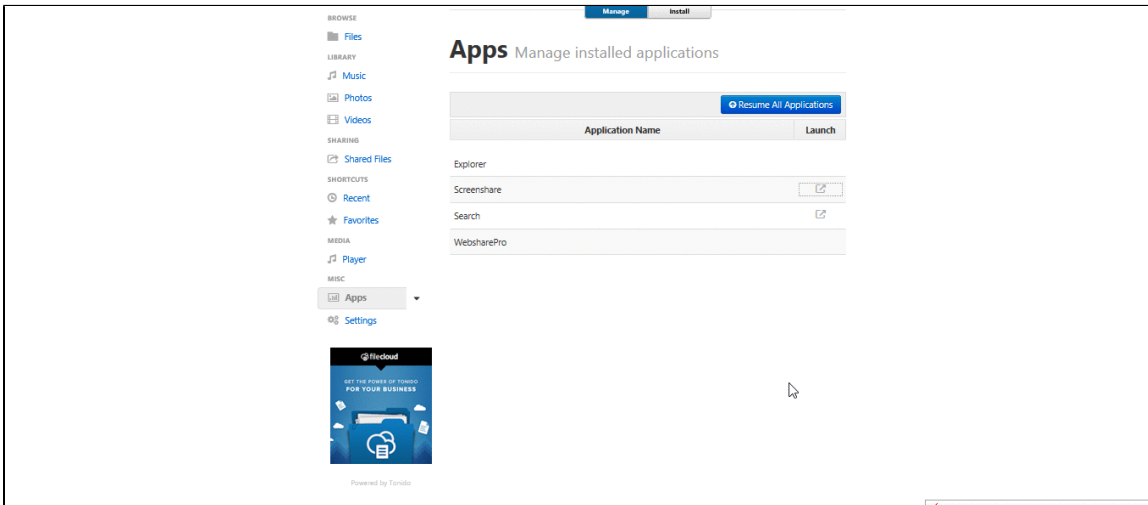

SCREENSHARE (for Tonido 1-Click Share)

Screen sharing is the easy way to collaborate with a friend or colleague.

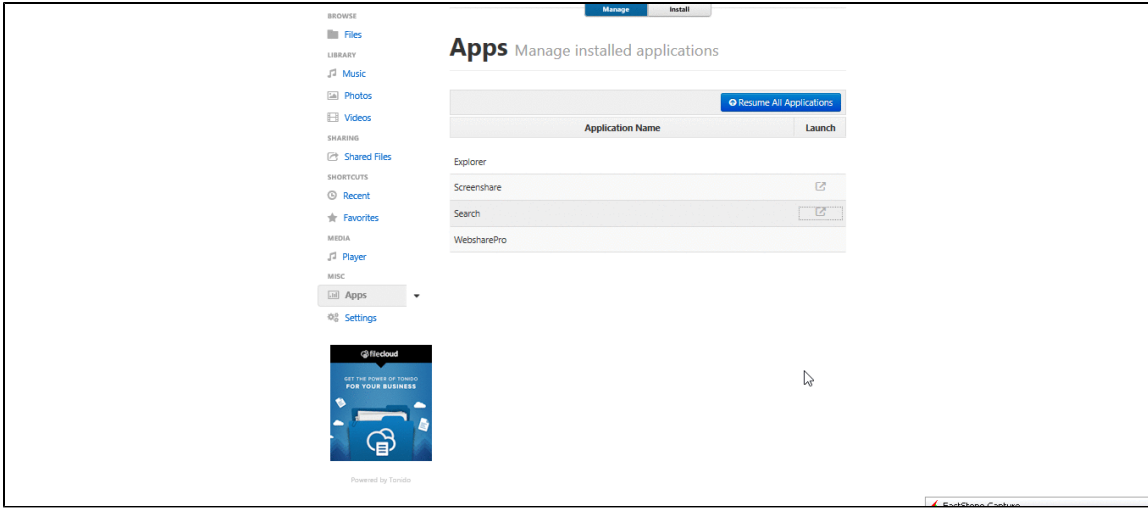

Once screen share is set up, "LIVE VIEW: " link can be given to friend or a colleague for screen sharing along with security user / password.

i **Tonido 1-Click Share**
[Tonido 1-Click Share](#) can be achieved only if "screenshare" app is installed.

SEARCH

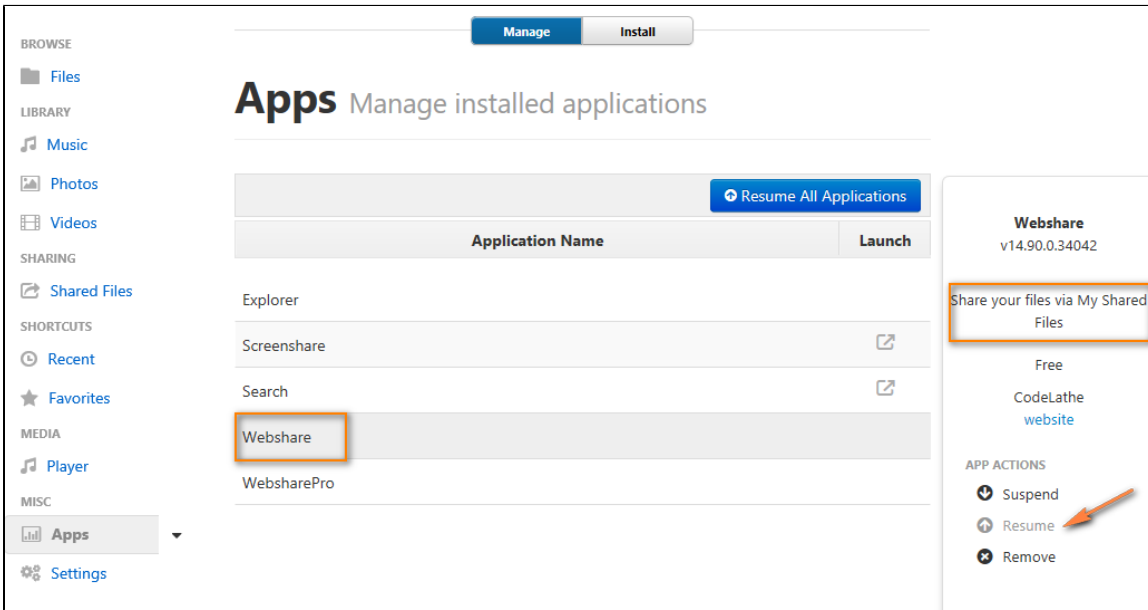

The search function is now available to search across all available document library in Tonido.

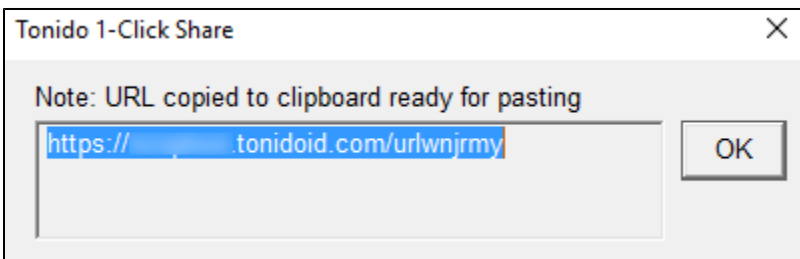

WEBSHARE PRO / WEBSHARE (both same now)

Webshare and Webshare Pro are now one and the same.

Webshare must be installed and be in status " resume" .

This would enable sharing of system files using Tonido 1-click share.

MEDIASERVER

Enjoy your photos, music and videos from anywhere. Quickly stream your entire media collection to any device. You are no longer limited by your phone's or tablet's capacity.

Make sure Mediaserver app is installed and in "resume" state in the Apps tab.

You will then notice icon on the left navigation panel.

The screenshot shows the "Media Configure UPnP/DLNA" interface. On the left is a navigation sidebar with categories: BROWSE (Files), LIBRARY (Music, Photos, Videos), SHARING (Shared Files), SHORTCUTS (Recent, Favorites), MEDIA (Player), and MISC (Media Files, Apps, Settings). The "Media Files" icon in the MISC section is highlighted with an orange box. The main content area is titled "Media" and "Configure UPnP/DLNA". It features a "Control Media Service" section with "Enable" and "Rescan Media" buttons. A yellow callout box with an orange arrow points to the "Enable" button, containing the text: "click on enable to scan the media files. Can also be disabled when not needed." Below this is a "Media Folders" section with an "Add Folder" button. A second yellow callout box with an orange arrow points to the "Add Folder" button, containing the text: "click on Add folder button to add a folder to media folders,". Below the button is a table with columns "Folder" and "Remove". The table contains one entry: "C:\Users\... \Music".

Media Configure UPnP/DLNA

Control Media Service

Enable Rescan Media

click on enable to scan the media files. Can also be disabled when not needed.

Media Folders

Add Folder

Folder	Remove
C:\Users\... \Music
